

**Apposite announces the 7th acquisition to date by its portfolio company
Swanton Care**

This represents the 25th bolt-on acquisition across Apposite's Fund II portfolio

Swanton Care and Community Limited ("Swanton") is pleased to announce that it completed its seventh acquisition. Green Rose Care Limited ("Green Rose") was added to the Swanton Group on 6th January 2022, strengthening its offering in Suffolk, England.

Green Rose specialise in assisting clients with the "Transforming Care Agenda" through clinical oversight and insight into forensic care. They are recognised for their high quality and successful support provided to highly complex clients. Green Rose also support young adults from the age of 17 to transition from children to adult services, a much needed growth avenue embraced by Green Rose over recent years.

Swanton provides specialist, high quality care including autism and learning disabilities and other services through its leading-edge facilities across England and Wales. The acquisition of Green Rose will allow Swanton to further increase its footprint in England and widen its offering of transitional and adult services.

Garry Cross, CEO of Swanton said: "We are delighted that the Green Rose team have joined the Swanton Group, they are a great addition as we continue to expand geographically and across service provision. Both companies' strong quality and ethos are very much aligned and this acquisition will allow us to improve our linked care pathways to better serve the needs of the people we support and their commissioners."

Swanton is now supporting over 590 people across the UK thanks to the excellent work of over 1,900 team members.

Sam Gray, Managing Partner of Apposite Capital LLP, said: "Swanton has successfully managed to grow organically and through 7 acquisitions. The team pays particular attention to integration especially around culture and quality and so the acquisitions have demonstrated strong post-acquisition organic growth. Swanton has a strong pipeline of further acquisitions and greenfield developments. Across our broader Fund II portfolio, growth through acquisition has proven a highly successful method to augment organic growth, with Green Rose representing the 25th bolt-on acquisition to date."

Advice and support to Swanton was provided by Trowers & Hamlins and Hazlewoods.
